

2022 FORD MAVERICK SUPERCREW

Complete Research Report — Bergeron Volvo Cars, Metairie, LA

THE SPECIFIC VEHICLE

Year / Make / Model:	2022 Ford Maverick SuperCrew (XLT trim)
Mileage:	19,381 miles
Asking Price:	\$25,977
Dealer Fee:	\$459
Total Price:	\$26,436
Exterior:	Iconic Silver
Interior:	Black Onyx / Medium Dark Slate
Drivetrain:	Front-Wheel Drive
Engine:	2.5L inline-4 hybrid (191 total system hp)
Transmission:	e-CVT (electronic continuously variable)
Towing Capacity:	2,000 lbs (hybrid standard)
Bed:	4.5 ft length, 33.3 cu ft volume
Fuel Economy:	42 city / 33 highway / 37 combined mpg
Warranty:	Remaining 3yr/36k basic, 5yr/60k powertrain
VIN:	3FTTW8E31NRA33254
Source:	Bergeron Volvo Cars, Metairie, LA
CarFax:	Free CarFax report available from dealer

PRICE REALITY CHECK

Kelley Blue Book Fair Purchase Price for a used 2022 Maverick XLT: **\$23,500**. Bergeron is asking **\$25,977** — about **\$2,500 above** KBB fair market, plus a \$459 dealer fee. That is roughly \$3,000 over KBB when all-in. With 19,000 miles, this is slightly above-market but not egregious. Negotiating room likely exists, especially given the recall history.

OWNER SATISFACTION RATINGS

Source	Overall	Recommend
Kelley Blue Book	4.2 / 5 (55 reviews)	85%
Cars.com	4.2 / 5 (46 reviews)	80%

Cars.com Owner Breakdown:

Value	4.5 / 5
Exterior	4.5 / 5
Performance	4.4 / 5
Comfort	4.4 / 5
Interior	4.3 / 5
Reliability	4.2 / 5

Owners who like it really like it — particularly the fuel economy, compact size, and versatility. Those who don't cite build quality issues, dealership service frustrations, and recall fatigue. The hybrid engine is the clear favorite among satisfied owners.

RECALLS — THE SERIOUS CONCERN

The 2022 Ford Maverick has been subject to an extraordinary number of recalls — **13 campaigns and counting**. Several are "previously repaired incorrectly," meaning Ford's initial fixes failed. For a first-year vehicle, this is a significant red flag.

Critical Recalls Requiring Immediate Attention:

1. 26S36 — FRONT LOWER CONTROL ARM BALL JOINTS (May 2026)

FORD SAYS: "DO NOT DRIVE" — PARK IT.

The front lower control arm ball joints may disconnect from the wheel knuckle, causing a sudden loss of steering control. Interim warning letters mailed June 2026. Final remedy not yet available.

2. 25S54 — ENGINE COMPARTMENT FIRE RISK (May 2025)

Applies directly to this 2.5L hybrid engine.

If the engine fails, oil and fuel vapor may leak into the engine compartment near hot components, causing a fire. Ford instructs owners: "Park and shut off the engine immediately if you hear unexpected noises, notice reduced power, or see smoke."

3. 25V685 — ENGINE BLOCK HEATER FIRE RISK (Oct 2025)

Block heater may crack, leak coolant, and short circuit when plugged in. Ford advises owners not to use the block heater until fixed.

4. 25V442 — REARVIEW CAMERA FAILURE (June 2025)

Rearview camera may display a blank image or remain stuck on screen after shifting out of reverse.

Additional Recalls (Software & Electrical Issues):

- 25C04 — Turn signals may fail to flash (FMVSS 108 violation)
- 25S07 — Rear tail lights may deactivate unexpectedly
- 25C06 — Instrument cluster may fail to display warning lights (hybrid models)
- 25C07 — Brake lights may illuminate without driver pressing the pedal
- 25S13 & 25S26 — 12V battery state of charge not detected; can cause loss of drive power
- 25S16 — Hybrid powertrain may shift into neutral unexpectedly, causing loss of drive
- 25S18 & 26C10 — Trailer brake and light systems may fail when towing
- 24V-140, 24V-267, 24V-293, 24V-330, 24V-590, 24V-730, 22V-193, 23V-380 — Earlier recall campaigns whose repairs were found to be inadequate

Action item: Before any purchase, run the VIN through Ford's recall database and NHTSA.gov. Confirm every open recall — especially 26S36 (control arms) and 25S54 (engine fire) — has been completed. If the 26S36 recall is open and unremedied, this vehicle should not be driven.

RELIABILITY & LONG-TERM COST

Owner-reported reliability scores (4.2/5) are decent but trail the Santa Cruz (4.6-4.7). The hybrid powertrain delivers outstanding fuel savings, but the sheer volume of recalls suggests systemic first-year build quality issues. Many recalls are software-related and fixed with updates, but the control arm and engine fire recalls are hardware failures with serious safety implications.

Ford warranty: 3-year/36,000-mile basic, 5-year/60,000-mile powertrain. This is substantially shorter than Hyundai's 5/60 basic and 10/100 powertrain coverage.

SAFETY

Standard equipment includes automatic emergency braking, trailer sway control, and a rearview camera. However, many advanced safety features (blind-spot monitoring, lane-keep assist, adaptive cruise) were optional even on the XLT, unlike the Santa Cruz where they come standard. The Maverick is a 2022 IIHS Top Safety Pick.

WHAT THIS VEHICLE ACTUALLY IS

The Maverick is a unibody compact pickup built on Ford's C2 platform (same as Bronco Sport and Escape). It drives like a crossover SUV, with a low 30-inch lift-in height for the bed. The 4.5-foot bed is larger than the Santa Cruz's 4-footer and can carry 4x8 sheets with the tailgate down. The hybrid powertrain is front-wheel-drive only; all-wheel drive requires the optional 2.0L EcoBoost engine.

If maximum fuel economy in a compact truck is the goal, the Maverick hybrid is unbeatable at 37 mpg combined. If all-wheel drive, towing over 2,000 lbs, or long-term peace of mind matter more, the Santa Cruz or a different vehicle may be the smarter choice.

BOTTOM LINE: The 2022 Maverick hybrid offers unbeatable fuel economy and practical utility at a reasonable price, but the recall history for this model year is genuinely alarming. If considering this vehicle, verify every recall is closed, insist on documentation, and factor the shorter Ford warranty into your decision. If the \$459 dealer fee and ~\$2,500 price premium are non-negotiable, the CarMax Santa Cruz starts looking more appealing despite its own higher price — simply for the warranty, the AWD, and the far cleaner recall record.
